

The bumper drilling kit for sensors is easy to use. It allows vehicle replacement bumpers to be perforated cleanly and precisely with the minimum number of tools. This set of punches offers many diameters allowing the drilling of bumpers of many brands.

ACCURACY AND SPEED

The Detector Bumper Drilling Kit is capable of drilling precise holes in plastic bumpers up to 5 mm thick, without damaging the vehicle's paint.

- The installation of the sensors is carried out in 3 steps:
- Quickly cut holes to the right size.
- Glue the sensor supports.
- Insert the sensors into their brackets.

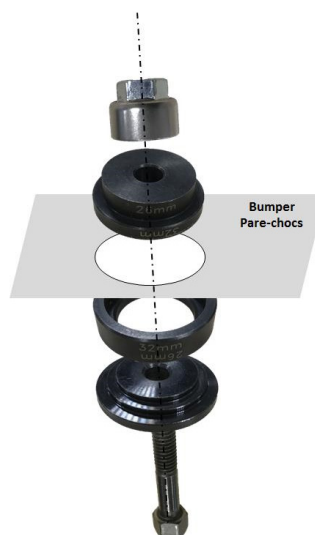

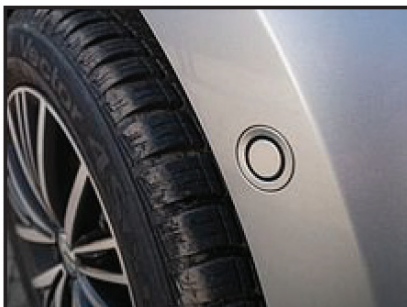

BOX COMPOSITION

- ✓ 1 drill HSS 5/16" HSS
- ✓ centering screw and lock nut
- ✓ 5 push discs
- ✓ 5 upper cutting discs each with two diameters
- ✓ 5 lower cutting discs each with two diameters

The complete kit includes 10 diameters:

Ø 17 - 18 - 18,2 - 19 - 20 - 22,5 - 24 - 26 - 26,7 - 32 mm.

1 upper cutting disc with two diameters:
26 mm at the bottom and 32 mm at the top
